Defence & Fuel competences

- Military Off The Shelf (MOTS) Equipment
- Shock Rated Pumps
- Fuel Handling Systems
- Helicopter Refuelling Systems
- OptiSave™ - Energy Saving System
- Project Management

DESMI offers a wide product range – completed by related services such as the design and installation of pump plants incl. helicopter refuelling, oil spill recovery and after sales service through its network of service centres. The DESMI pump range is suitable for most types of vessels and is highly adaptable as regards design and material combinations. Basic pump proven on commercial ships and designed for a life at sea. In

addition, DESMI designs and builds fuel handling solutions used by air- and army forces around the globe, as well as ballast water treatment systems.

Oil Spill Response

The oil spill response solutions from DESMI are trusted in the industry. Whether your requirement is for the offshore or the shoreline area; the Arctic or Equatorial environment, we continue to deliver proven solutions for all spill conditions – and we offer the very best life cycle costs.

History

DESMI was founded in 1834 by Henning Smith and is one of Denmark's oldest companies. Now, DESMI is a leading supplier of complete pump packages and

systems in 28 locations in 15 countries, 2 factories, 1 foundry, 3 distribution centres, and +600 employees. The DESMI pumps and systems are sold to more than 100 countries via a network of subsidiaries and distributors on six continents. In 2011 DESMI was awarded the prize Entrepreneur Of The Year in Denmark and in 2014 we received the Net Member Award from the Danish Export Association.
