The Risk Intelligence System is an integrated supply chain System that provides you with a single point of access for all relevant transport related security risk intelligence.

The System is a fully integrated, unrivaled risk assessment and planning tool, providing valid, actionable intelligence to any fleet, on land, in port or at sea, 24/7. All data within the system is carefully collected, analysed and systematically assessed by the Risk Intelligence analysts, the majority of whom have at least 10-15 years of experience.

With a subscription to the Risk Intelligence System you get one

easy to navigate end-to-end solution for maritime, port and land security intelligence.

The Risk Intelligence System consists of three modules:

- MaRisk
- PortRisk
- LandRisk

They can be used as one integrated solution or customers can subscribe to only one module.

MaRisk, PortRisk and LandRisk can easily be accessed on a computer, tablet or smartphone via a web browser.

Request a free trial

Do you want to experience how useful, interactive and user friendly the Risk Intelligence System is?

Sign up for a free trial of the Risk Intelligence System. You will get full access to the System for two weeks and you can have up to five users set up for the trial.

The free trial includes a free demo of the Risk Intelligence System which is a walk-through of the System so you can get full value within the trial.
