Focused on aiding naval forces with maritime software and expert services, Weilbach stands as your perfect partner. We design software solutions for organizations to acquire, process, and analyze their marine data efficiently.

As experts in managing extensive data sets, we specialise in presenting information in a clear, user-friendly manner, effectively solving your maritime challenges and maximizing the utility of your data.

Tailored to the unique needs of each organization, our software swiftly addresses challenges and achieves goals within an intuitive platform. Our custom-made software seamlessly integrate with your workflows and methods, providing a fully integrated solution.

Navigational Expertise:

Specialising in creating electronic charts and navigation software designed for maritime use, our solutions ensure precise navigation. Even in challenging environments and conditions, our software helps commanders navigate safely and efficiently.

Safety at Sea:

Safety is our top priority. We offer comprehensive safety solutions including voyage planning tools to enhance safety for personnel and vessels, minimizing the risk of accidents and incidents at sea.

Operational Efficiency:

Our technology and services are geared towards optimizing operations at sea. From route optimization to accurate marine distance calculations, we help to achieve objectives with maxi-

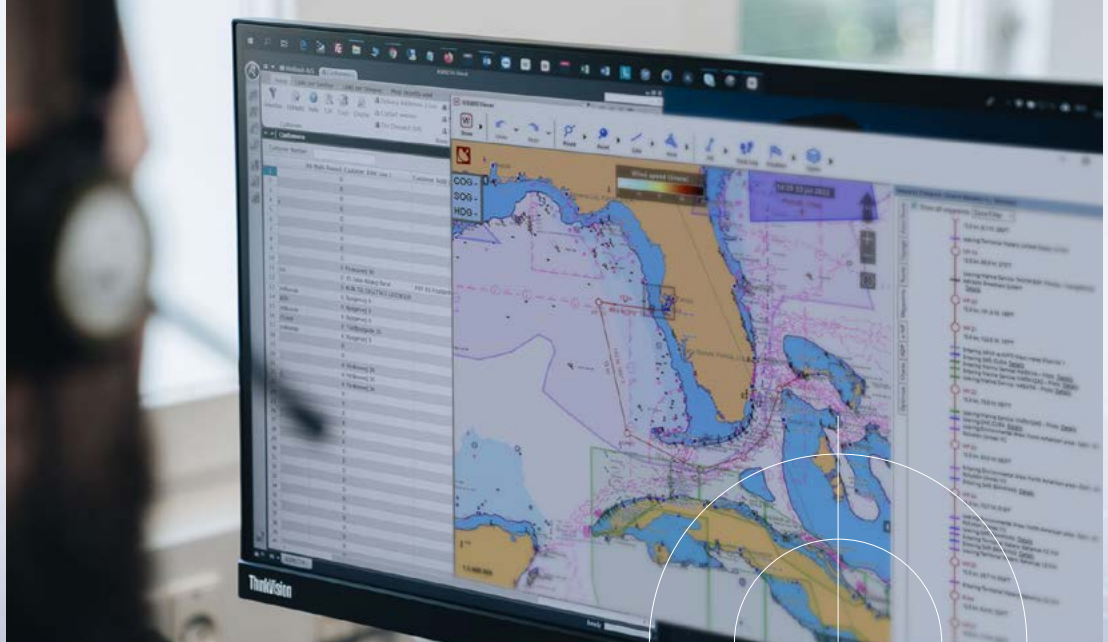

mum efficiency and minimal resource wastage.

Global Support Network:

With a global network of offices, we provide 24/7 support worldwide. Our team of maritime experts offers support ranging from routine maintenance to emergency response, ensuring timely support wherever your vessels operate.

Trusted Partner:

We pride ourselves on being a trusted partner to some of the largest shipping companies and Hydrographic Offices around the world. Our focus on delivering reliable solutions and exceptional support has earned us a reputation for excellence in the maritime industry.

Software for ships and shipping companies

Weilbach makes nautical software for the maritime industry used by some of the industry's biggest names.

Here are our ready to go software solutions that streamline operations on board:

OneLog

Replace traditional paper log books with a digital system to record daily activities on board, removing handwriting errors. Role-based logins provide an extra layer of security.

SeaReader

Quickly and easily access the largest collection of maritime eBooks at the touch of a button in our digital library. With all the mandatory publications instantly available to keep you compliant, we maintain the library so it is always up to date.

Viewer

A back of bridge multi-tool to plan, navigate, and optimize routes on board and shoreside.

Add-on services and functionality are available in Viewer for a totally expandable solution, including AVCS NAVAREA Warnings, Load Lines, and Time Zones.

PAYS (Pay As You Sail)

Have a full set of charts available to access immediately for free of charge planning and pay for them when the cell is entered. The automatic ordering of charts saves save time and resources.

ENCX

Add marine charting functionality to your own software quickly and easily. With both vector and raster chart functionality and support for all major chart formats, you can build a range of software.

AtoBviaC

Generate accurate and realistic marine distances and route calculations between ports with our range of products that makes AtoBviaC the definitive distance provider to the shipping industry.

Contact us to learn more about how Weilbach can support your naval operations with our proven technology and expertise. Together, let's navigate the challenges of the maritime domain.
